EDUCATION

North Carolina State University

GPA: 4.0

- Bachelor of Computer Science
- Graduated December 2019

EXPERIENCE

Software Engineer at Cisco

Jan '20-Present

- Secured our application to be deployed in the cloud
- Simplified away 3,000 lines of code to improve reliability

Software Engineering Co-Op at Cisco

May '19-Jan '20

- Administered an 11-node, multi-master Kubernetes cluster
- Awarded "Connected Recognition" for fixing a critical security bug

Software Engineering Intern at Inmar

May '18-Aug '18

- Built a scalable and fault-tolerant chat bot that processes rebates
- Improved .NET build times by 38%
- Learned C#, AWS, Python, Docker, and OpenCV

Software Engineering Co-Op at Honeywell

May '16-Dec '17

- Built the data pipeline of a \$100M web app that detects electricity theft
- Optimized our most common query to be 13x faster
- Learned Python, Django, Kubernetes, Celery, and SciPy

PERSONAL PROJECTS

Hackathon Award Winner (github.com/mac-chaffee/pachkacks2019)

May '19

- Built an app that reminds you to use gift cards when you walk into a store
- Won 3rd place overall
- Learned about Android development and Google APIs

CrowdSort (gitlab.com/mac-chaffee/crowdsort)

Jan '18

- Developed a satirical website where users sort random data
- Learned Elixir, Phoenix, and WebSockets

Hackathon Award Winner (github.com/mac-chaffee/candidata)

Nov '16

- Designed a site that compares political candidates using data from three APIs
- Won the prize for "Coolest Web App"

NCSU Menu Notifier (ncsu-mn.com/about)

Aug '16

- Architected a site to text notifications about dining hall menus
- Pitched the website to the director of NC State Dining
- Implemented high code coverage, test-driven development, and CI/CD
